

VP300 Pro

An Engineered PIN Pad

Where Security Meets Convenience

The VP300 Pro PIN Pad, designed for today's fast-paced environments, offers secure, efficient, and flexible cashless payments, enhancing customer experience and simplifying transactions.

User-Friendly and Intuitive Experience

The VP300 Pro's large, 3.5-inch capacitive touch screen makes transactions more interactive and efficient. Customers can easily complete e-signatures without any lag and make quick transactions with a display of products up to 16 lines.

Host Card Emulation (HCE) Supporting

With HCE technology, the VP300 Pro PIN Pad goes beyond standard payment processing by enabling value-added services like loyalty programs and digital receipts. Merchants can foster customer loyalty and create personalized experiences while still using secure, card-less transactions.

Easy Integration Option

The VP300 Pro seamlessly integrates through versatile USB ports, making it adaptable to different retail setups. Whether it's a small boutique or a large retail chain, the PIN pad's flexible integration options ensure it can work in various environments.

Secure and Convenient Contactless Payments

Equipped with magnetic stripe, smart card, and contactless card readers, the VP300 Pro offers flexibility in payment methods. This versatility means that businesses can accept a wider range of payments—from traditional swipe cards to tap-to-pay mobile transactions.

Features

3.5 Inch Touchscreen Display

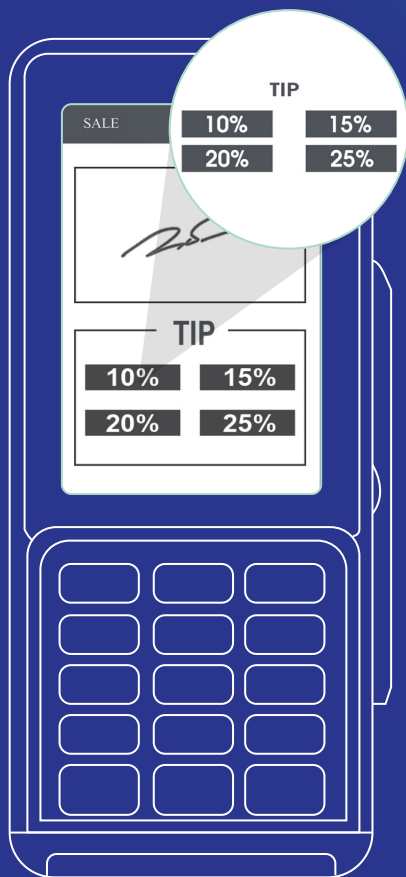

EMV

Digital Signature Capture

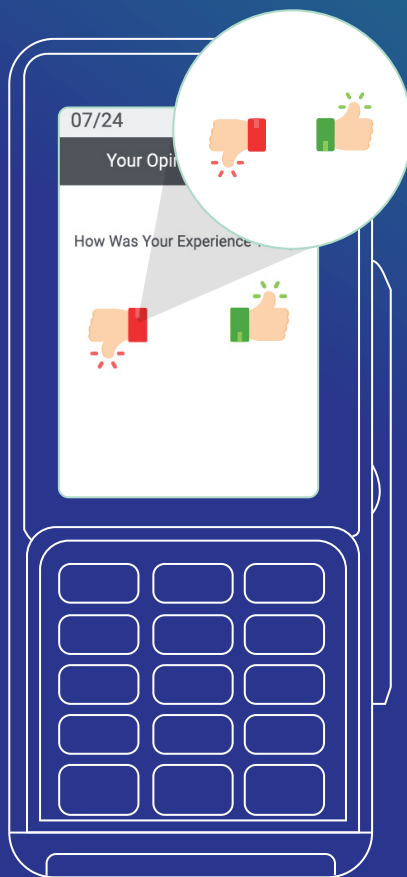

PCI PTS 6.x Certified PIN Pad

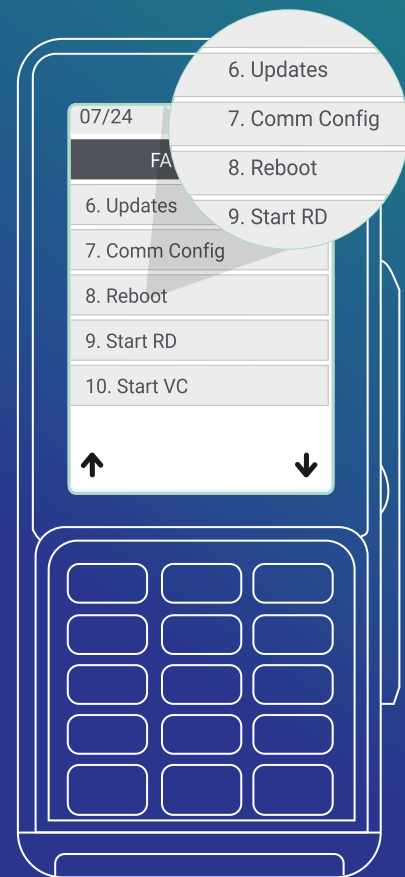

Smart Tipping

Suggests tip amounts automatically based on the bill, making checkout faster and tipping easier for customers — while helping merchants boost tip totals effortlessly.

Valor Portal & Engage My Customer

Show payment confirmations and branding messages right on the PIN Pad screen.

Remote Device Management

Monitor, update, and troubleshoot PIN Pads remotely—minimizing downtime and support costs.
